It is written from the viewpoint that design is the central activity of the engineering profession, and it is more concerned with ...

Engineering Design : George Dieter : 9780071326254

The engineering design process is a common series of steps that engineers use in creating functional products and processes. The process is highly iterative - parts of the process often need to be repeated many times before another can be entered - though the part(s) that get iterated and the number of such cycles in any given project may vary.
