## **89 YJ Vacuum Canister - Quadratec Jeep Forum**

A common issue with the YJ Jeeps is a failure in the automatic vacuum system that locks and unlocks the hubs when going in and out of 4 wheel drive. The vacuum hoses can also cause the 4WD system not to engage and can occur when 4H is selected and everything in the vacuum system is working but the vacuum pressure does not travel all the way to the front axle shift motor.

The YJ has a 2-piece axle shaft on the front passenger side. This shaft has a vacuum operated disconnect on it. Failure of that vacuum motor is the most common cause of the symptoms you describe. You basically have 3 options: 1. Fix the existing system. 2.

### **89 Jeep Wrangler YJ 4.2L 4wd problems. What could be wrong ...**

The '87 YJ might have served as a poor test dummy for the Wrangler line, but the Jeep Wrangler did add many features throughout the YJ generation we enjoy on JK models today. New features included fog lights on the Laredo, larger U-Joints on the last YJ model year, an extended roll bar on '92 models, and even anti-lock brakes became standard by 1993.

Good Luck, all your going to get is a website showing a diagram that makes very little sense. I'm going thru the same thing. I have an 89 YJ that I just finished the Nutter Bypass on and now I'm trying to get the carb and vacuum lines all hooked up again. This thing was a real piece of work when I bought it.
