Intermediate Exposure Guide for Manual Mode Photography

As we learnt in the previous 2 articles, in the Aperture-priority AE and Shutter-priority AE modes, the user sets the aperture/shutter speed manually, and the camera automatically calculates and sets the remaining settings that would provide optimum exposure. However, in Manual exposure mode, both the aperture and the shutter speed are determined by the user and reflected in the image—the camera does not automatically set any of the exposure settings.

There are no real surprises once you've truly mastered manual mode, as you'll have full control of the three major points of the exposure triangle aperture, shutter speed and ISO. We'll go into detail on each of these points later in this article, but for now here's a brief list of the situations where knowing manual mode is a big plus:

Photography 101: How Do I Start Shooting in Manual Mode?

MENU→ (Camera Settings) → [Shoot Mode]→ [Manual Exposure]. Press the bottom side of the control wheel to select the shutter speed or aperture value, then turn the control wheel to select a value. When [ISO]is set to other than [ISO AUTO], use MM (Metered Manual) to check the exposure value. Toward +: Images become brighter.

Help Guide | Manual Exposure

Turn the camera's mode dial to Manual or Bulb shooting mode and use a slow shutter speed (5-30 seconds) for a longer exposure. The longer the exposure, the mistier the water appears. Use your camera's self-timer or a cable release to take the photo with absolutely no blurring. Don't use flash because it could ruin the effect in the image.

Long Exposure Photography Tips | Night Photography Tips

Don't be fooled by the name 'manual mode' when it comes to setting exposure, you can still use your camera's exposure level as a guide. The camera deems what it considers to be the correct exposure, and then it will display an exposure range that typically covers 2 or 3 stops above and below this.
