The Caregiver The Second Cancer

A second cancer is a new cancer that happens in someone who has had cancer before. It is a completely new and a different type of cancer than the first one.A second cancer is not the same as a cancer recurrence. A recurrence happens when the first cancer comes back. If you are a cancer survivor, you probably watch for recurrence. A recurrence is the same type you had before.

But while the person with cancer appears to draw too much attention, the caregiver is considered a distant second. Caregiving can be extremely stressful and frustrating, as you continue to cope ...

The Journey of a caregiver with a cancer patient

The impact and consequences of cancer on the patients and their family caregivers (FCs) are closely intertwined. Caregivers' burdens can be increased due to the patients' unmet needs and unresolved problems. Additionally, the caregivers' unmet needs may adversely affect their own well-being and the patients' health outcomes. This study aims to determine the palliative care needs and ...

The cancer experience has an impact not only on patients, but also on their relatives (e.g., spouses, parents, or siblings), who often have to assume a caregiving role for the duration of and following treatment for cancer. Moreover, the caregiver plays an important role in supporting a man with a testicular cancer, providing physical and ...

Caregiver Emotional Burden in Testicular Cancer Patients ...

Objective: Few studies have examined the triadic communication between patients, spouse caregivers, and nurses in the home hospice setting. Thus, little is known about the types of communication patterns that unfold. The goals of the study were to, first, identify common patterns of communication in nurse-patient-caregiver home hospice visits and, second, to identify nurse, caregiver-patient ...
